CAREER OBJECTIVE

Mechanical engineering undergraduate expecting to graduate in June 2029, with hands-on experience in robotics and smart-car competitions. Seeking a research-and-development internship to apply mechanical design, prototyping and problem-solving skills to real engineering projects.

EDUCATION

Beijing University of Chemical Technology (BUCT) Expected June 2029

Bachelor of Engineering in Mechanical Engineering
GPA: 3.22 / 4.33

Relevant Coursework: Higher Mathematics, College Physics, Linear Algebra, Engineering Drawing (AutoCAD), Theoretical Mechanics, Mechanics of Materials, Engineering Materials, Mechanical Design

ENGINEERING EXPERIENCE

Engineering Training — Metalworking Practicum, BUCT Sept. 2026 - Jan. 2027

- Operated lathe, milling and bench-work equipment to machine basic parts to drawing specifications
- Completed a bench-work fitting and assembly task as part of the team's training assessment

RAICOM Robotics Competition — Team Member May - Aug. 2026

- Programmed and tested the robot's motion control with Arduino and Python, debugging movement faults across multiple practice rounds
- Created and presented the team's design proposal and technical documentation, contributing to the **National Second Prize**
- Collaborated with teammates to analyze and resolve mechanical and control problems during assembly and commissioning
- Prepared competition materials and communicated design ideas clearly in team discussions

BUCT Smart Car Competition — Team Member Sept. - Oct. 2025

- Developed and tested the line-tracking control program, improving the car's tracking stability before the final run
- Completed sensor calibration and on-track debugging with teammates, earning the **Excellence Award**

SKILLS

Software: SolidWorks, AutoCAD, Python, Arduino, DeepSeek (AI tools), Microsoft Office (Word, Excel, PowerPoint)
Languages: Cantonese (native), Mandarin (native), English (fluent)

CERTIFICATIONS

CET-6 (College English Test Band 6) · Driving Licence (C1)

HONORS & AWARDS

National Second Prize, RAICOM Robotics Competition (2026)
Excellence Award, BUCT Smart Car Competition (2025)
